PROFESSIONAL SUMMARY

Mechatronics Engineer transitioning into backend software development, seeking junior or trainee opportunities. Experienced in building REST APIs, designing relational databases, implementing authentication systems, and developing internal tools to streamline business processes. Passionate about creating reliable, maintainable, and scalable software while continuously expanding my technical skills.

TECHNICAL SKILLS

Programming Languages: JavaScript, TypeScript, Python, SQL
Backend: Node.js, Express.js, REST APIs, JWT Authentication, Puppeteer
Databases: PostgreSQL, MySQL, SQLite, Relational Database Design
Frontend: HTML, CSS, Basic React
Tools: Git, GitHub, Postman, npm

PROFESSIONAL EXPERIENCE

Go-Laser

Production Assistant / Backend Developer

Mar. 2023 – Present

- Developed the backend for a custom order management platform using Node.js, Express, and PostgreSQL, enabling customers to upload laser-cutting files and track their orders.
- Implemented JWT-based authentication, role-based access control, and workflows for users, orders, vector files, and production status management.
- Automated production status updates and email notifications, reducing manual tracking of internal orders.

CIATEC A.C.

Junior Developer, Biomechatronics Department

Jan. 2022 – Feb. 2023

- Built a patient management system using Node.js, Express, and MySQL to manage clinical records, 3D scans, and digital models.
- Designed and implemented the relational database structure for patient information, studies, 3D models, and technical follow-up.
- Automated PDF report generation using HTML templates and Puppeteer while collaborating with specialists to ensure data accuracy.

Press Herramentales

Engineering Intern, Production Optimization

Jul. 2021 – Dec. 2021

- Developed a production monitoring prototype using Node.js, WebSockets, and SQLite to visualize real-time operational activity.
- Created Express API endpoints for production efficiency metrics, contributing to a 15% reduction in production cycle time per part.

TECHNICAL PROJECTS

Custom Order Management API: Backend application for managing users, vector files, orders, and production status using *Node.js, Express, PostgreSQL, and JWT Authentication*.

Patient Management and Reporting System: Internal platform for clinical records, 3D models, and automated PDF report generation using *Node.js, MySQL, and Puppeteer*.

Production Monitoring System: Prototype for collecting operational data and production efficiency metrics using *Node.js, WebSockets, and SQLite*.

EDUCATION

Universidad Iberoamericana León

Bachelor of Science in **Mechatronics Engineering**

2018 – 2023

Overall GPA: 9.8/10

Leadership Activities: President of the Engineering Student Society; Secretary of the Student Organizations Council.

ADDITIONAL TRAINING & LANGUAGES

Course: Complete Web Development (HTML5, CSS3, JavaScript, PHP, MySQL).

Languages: Spanish (Native), English (Upper-Intermediate).
